- **Improvement** of Clients' management systems by increasing effectiveness of internal business processes of our clients, improving qualification and skills of personnel through automation and optimization of business processes.

Main areas of activity

Internet development	Payment systems	Management systems
Development of smartphone applications, site+smartphone	Development of turnkey payment systems with diverse interfaces and different Billers connected to the System	Development of any complex systems using agile development with top quality team
Development of complex web projects of any scope	Development of e-commerce systems	Working with diverse equipment, partners in China, implementation of hardware+software information systems
Development of high capacity systems	Working with electronic signatures, currencies	Development of Corporate Information System

Agile software development

Techostan	Standard practice
Flexible Product is not limited by specifications	Rigid Product is implemented strictly according to the specifications
Iterations Product versions are provided every 2-3 weeks	Monolith Product is provided at the end of development cycle, 1-1.5 years.
Development Product is developed using feedback from clients.	Stagnation Product is what described in specifications without real opinion of users
Focus on client Client participates in the development of the product.	Focus on programmer Minimum participation from the client in making operational decisions.
Simplicity Less lines of code, less bugs, more manageability.	Complexity Complex structures, hard to use and identify bugs.

Full cycle services

Goal of our company is to make the process of ordering and using software product simple that is why we follow this practice:

- We create the Technical assignment ourselves or we help you in creating one.
- After development of the Technical assignment we develop workplan with detailed breakdown by iterations with all dates indicated.
- We install product at your side.
- We train your personnel on using the product..
- We support our Clients at any phase of product use.
